Project description:

The project concerns the expansion of the Research and Development Center, stimulating the potential of Linetech innovative activities. As part of this initiative, it is planned to initially implement the following research problem related to the following issues:

- Methodical development of NDT analysis results using the radiographic inspection technique using two measurement technologies.

Considering the stage of completion of the planned works and the available human and infrastructure resources, the Applicant has planned a project implementation period of 30 months. Due to the specificity of the tasks carried out and the effects of project implementation, the Applicant decided to run the project in Jasionka. In this place, the Applicant has adequate surface facilities which enable to carry out the planned work properly.

Project value: 3 116 150 PLN

Contribution of European Funds: 1 844 690 PLN
